PROFESSIONAL OBJECTIVE

Detail-oriented Full-Stack Web Developer with strong expertise in HTML, CSS, JavaScript, and React, focused on building responsive, user-friendly web applications that enhance user experience and meet business needs. Skilled in translating UI/UX designs into clean, efficient, and maintainable code while contributing to the development of high-performance digital products. Possesses foundational knowledge of Python and Django, with the ability to support backend development tasks, integrate APIs, and collaborate effectively on end-to-end solutions.

SKILLS

SOFT SKILLS

- Problem solving
- Team Work
- Communication
- Time Management

TECHNICAL SKILLS

PROJECTS

- **Banking website:** <https://banking-web-project.vercel.app/>
 - **Situation:** Sought to strengthen my frontend development skills by working on a real-world inspired project focused on financial services interfaces.
 - **Task:** Design and develop a visually structured and user-friendly banking application interface that simulates core features such as account overview, transactions, and user navigation.
 - **Action:** Built a responsive and well-organized user interface using HTML and CSS. Focused on layout structuring, styling, and creating an intuitive user experience by designing key pages such as dashboard, account summary, and transaction views. Applied modern CSS techniques to ensure responsiveness across different screen sizes.
 - **Result:** Delivered a clean, responsive banking application interface that demonstrates strong understanding of layout design, responsiveness, and UI structuring. Enhanced ability to translate real-world concepts into functional and visually appealing web interfaces.

- **Restaurant website:** <https://restaurante-mq6r.vercel.app/>
 - **Situation:** Aimed to improve my frontend development skills by building a real-world project focused on creating engaging and user-friendly interfaces for the food and hospitality industry.
 - **Task:** Design and develop a responsive restaurant web application interface that showcases menu items, improves navigation, and provides an appealing user experience for potential customers.
 - **Action:** Developed a visually appealing and responsive interface using HTML and CSS. Designed key sections such as homepage, menu display, and contact page, focusing on layout, typography, and color schemes to enhance usability and visual appeal. Ensured the application adapts well across different devices using responsive design techniques.
 - **Result:** Successfully created a clean and engaging restaurant web interface that highlights strong UI design and responsive development skills. Improved ability to structure content effectively and deliver user-friendly digital experiences.
